Summary

Full-stack Developer with 3+ years building production APIs and database-driven systems in ASP.NET Core (C#), Node.js, and PostgreSQL. Experienced in API design, data access, role-based authorization, and backend architecture, with additiona systems engineering (C++) background.

Technical Skills

Languages: C#, Go, PHP, C++, TypeScript/JavaScript, SQL, NoSQL
Frontend: React, React.js, React Native, AvaloniaUI
Backend: ASP.NET Core, Laravel, Node.js, ADO.NET, Supabase
Databases: PostgreSQL, MongoDB, Oracle, Firebase
Tools & Other: Git, Linux, CMake, Unity

Experience

Integrated Technology Group (ITG) — *Product Development Trainee* Amman, Jordan · 02/2025 – 10/2025

- Built web applications across ASP.NET Web Forms, MVC, and .NET Core, delivering both UI and backend functionality.
- Developed and integrated Web APIs using ADO.NET and Entity Framework for data access.
- Built responsive interfaces with HTML5, CSS3, Bootstrap, and JavaScript; debugged and performance-tuned features across modules.

Jam3et Games — *Game Developer* Amman, Jordan · 06/2023 – 01/2024

- Built an idle card game for mobile in Unity (C#), collaborating with a small team across design and deployment.
- Planned milestones, implemented gameplay systems, and resolved platform-specific issues.

Projects

Zyro Browser — *Lightweight experimental browser (C++ / WebKitGTK)*

- Built a browser from scratch in C++ with WebKitGTK and a custom HTML/CSS-rendered UI.
- Focused on performance and privacy with encrypted local storage; new-tab dashboard surfaces live CPU/RAM, favorites, and search.

University Registration System — *Software Developer (Freelance)* Amman, Jordan · 10/2025 – 02/2026

- Built a production university registration SPA in vanilla JavaScript and Supabase (PostgreSQL, Auth, RLS, Edge Functions).
- Implemented role-based access for students, instructors, and admins with real-time enrollment, waitlists, and prerequisite validation.
- Developed an AI-powered academic advisor (Deno/TypeScript + LLMs) that generates optimized, conflict-free schedules.
- Built custom scheduling algorithms and an interactive SVG curriculum map with pan and zoom.

BoomBx — *Cross-platform soundboard & audio router*

- Built in .NET 8 with AvaloniaUI; routes low-latency audio through a virtual microphone via VB-Cable and WASAPI.

Education

Al Hussein Technical University — *B.Sc. Computer Science Pearson BTEC* Amman, Jordan

- Clubs: ACM (Event Manager), IEEE (IEEEXtreme Ambassador) · Coursework: Data Structures & Algorithms, Operating Systems, System Analysis & Design, Systems Programming

Certifications & Additional

Certifications: Full-Stack Development Course; Red Hat Application Development I: Programming in Java
Languages: Arabic (Native), English (Fluent) · **Volunteer:** IEEE Jordan Section & IEEE Student Club (event booths)
