Summary

Full-Stack Developer with 3+ years building production web, mobile, and backend systems in ASP.NET Core and React. Focused on backend architecture, API design, and scalable, database-driven applications.

Education

Al Hussein Technical University — *B.Sc. Computer Science Pearson BTEC* Amman, Jordan · Expected Feb 2027

- Clubs: ACM (Event Manager), IEEE (IEEEXtreme Ambassador) · Coursework: Data Structures & Algorithms, Operating Systems, System Analysis & Design, Systems Programming

Technical Skills

Languages: C++, C#, JavaScript/TypeScript, SQL, NoSQL

Frameworks: ASP.NET Core, React, React Native (Expo), Node.js, Unity, AvaloniaUI

Tools & Data: Git, Supabase, Firebase, PostgreSQL, MongoDB, ADO.NET, CMake

Experience

University Registration System — *Software Developer (Contract)* Amman, Jordan · 10/2025 – 02/2026

- Built a production university registration SPA in vanilla JavaScript and Supabase (PostgreSQL, Auth, RLS, Edge Functions).
- Implemented role-based access for students, instructors, and admins with real-time enrollment, waitlists, and prerequisite validation.
- Developed an AI-powered academic advisor (Deno/TypeScript + LLMs) that generates optimized, conflict-free schedules.
- Built custom scheduling algorithms and an interactive SVG curriculum map with pan and zoom.

Integrated Technology Group (ITG) — *Product Development Trainee* Amman, Jordan · 02/2025 – 10/2025

- Built web applications across ASP.NET Web Forms, MVC, and .NET Core, delivering both UI and backend functionality.
- Developed and integrated Web APIs using ADO.NET and Entity Framework for data access.
- Built responsive interfaces with HTML5, CSS3, Bootstrap, and JavaScript; debugged and performance-tuned features across modules.

IndoArabi — *App Developer (Freelance)* Amman, Jordan · 10/2024 – 12/2024

- Built an Arabic-learning mobile app for Indonesian users in React Native (Expo) and TypeScript.
- Implemented the backend and data sync with Supabase (SQL + Node.js) and packaged the app for client distribution.

Jam3et Games — *Game Developer* Amman, Jordan · 06/2023 – 01/2024

- Built an idle card game for mobile in Unity (C#), collaborating with a small team across design and deployment.
- Planned milestones, implemented gameplay systems, and resolved platform-specific issues.

Projects

Zyro Browser — *Lightweight experimental browser (C++ / WebKitGTK)*

- Built a browser from scratch in C++ with WebKitGTK and a custom HTML/CSS-rendered UI.
- Focused on performance and privacy with encrypted local storage; new-tab dashboard surfaces live CPU/RAM, favorites, and search.

BoomBx — *Cross-platform soundboard & audio router*

- Built in .NET 8 with AvaloniaUI; routes low-latency audio through a virtual microphone via VB-Cable and WASAPI.

Certifications & Additional

Certifications: Full-Stack Development Course; Red Hat Application Development I: Programming in Java

Languages: Arabic (Native), English (Fluent) · **Volunteer:** IEEE Jordan Section & IEEE Student Club (event booths)
